                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence 1, Application US/08752929
Patent No. 5798259
GENERAL INFORMATION:
GENERAL INFORMATION:
APPLICANT: YAZAWA, Kazunaga
APPLICANT: YAZAWA, Kazunaga
APPLICANT: YAZAWA, Kazunaga
APPLICANT: KONDO, Kiyosi
TITLE OF INVENTION: Gene Coding for Bicosapentaenoic Acid Synthesizing
TITLE OF INVENTION: Brzymes and Process for Production of Biscosapentaenoic
TITLE OF INVENTION: Acid
NUMBER OF SEQUENCES: 25
CORRESPONDENCE ADDRESS:

/note="Vector: pBluescript II SR-; Site_I: EccRI; Site_2:
XhoI; Deflagellation library, constructed by John Davies
and Jeffrey McDermott, combines cDNAs from CC-1690 cells
which had been re-synthesizing flagella for 15, 30 and 60
min after being deflagellated by pH shock. PolyA mRNA was
purified from each sample, pooled and cDNA synthesized.
The cDNA was directionally cloned into lambda Zap_II
(Stratagene) in the EccRI (5') and XhoRI (3') sites.
pBluescript II SK- plasmids were excised from the lambda
ZAP clones by superinfection with ExAssist (Stratagene)
phage. The library was normalized using method 4 described
in Bonaldo et al., (1996) Genome Research 6: 791-806."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   AU069821 Rice panicle at flowering stage Oryza sativa (japonica cultivar-group) cDNA clone B3726_7A, mRNA sequence.

polylinker; Site 1: Not 1; Site 2: Eco RI; NoT CGAP_Sub7
is a subtracted Tibrary derived_from NCI CGAP_Sub6. The
NCI CGAP_Sub7 library had 12 million recombinants. A
single-stranded DNA preparation of NCI CGAP_Sub6 was used
as a tracer in a subtractive hybridization with a driver
comprising; the IMAGE pool (NCI CGAP_Sub6 was used

First strand CDNA was primed with a primer [5, GAGAGAGAGAGAGACGATTTTTTTTTTTTTTTTN 3], CDNA was prepared by using trehalose thermo-activated reverse transcriptuse and subsequently enriched for full-length by cap-trapper. CDNA went through one round of normalization to Rot = 10.0 and subtraction to Rot = 229.4. Second strand CDNA was prepared with the primer
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Submitted (18-AUG-2000) Yoshihide Hayashizaki, The Institute of Submitted (18-AUG-2000) Yoshihide Hayashizaki, The Institute of Physical and Chemical Research (RIKEN), Laboratory for Genome Exploration Research Group, RIKEN Genomic Sciences Center (GSC), RIKEN Yokohama Institute; 1-7-22 Sushiro-cho, Tsurumi-ku, Yokohama, Kanagawa 230-0045, Japan (E-mail:genome-res@gsc.riken.go.jp, Fax:81-45-503-9216)
